

BLACKBERRY Podcast Instructions

1. Go to <http://appworld.blackberry.com/webstore/content/2857>
2. OR you can download apps through the BlackBerry App World icon on your phone. There are many apps you can choose from to play podcasts; however, this one is the most recommended.

The screenshot shows the BlackBerry App World interface. The top navigation bar includes 'BlackBerry', 'North America', 'Partners', 'Developers', 'Why BlackBerry', and a search bar. Below the navigation bar are tabs for 'SMARTPHONES', 'APPS & SOFTWARE', 'COMMUNITY', 'SUPPORT & SERVICES', 'SOLUTIONS', and 'WHERE TO BUY'. The main content area features the 'PodTrapper Podcast Manager' app by Versatile Monkey. The app is priced at US\$9.99 USD and has a 'Purchase' button. The app description states: 'Podtrapper is a robust podcast player and download manager for BlackBerry® devices. Podcasts are radio shows available for free on the web.' The features list includes: automatic downloading of new episodes via WiFi, Cellular and Desktop; keeps track of last played podcast; remembers where you left off in every episode and file; reliable pause and resume of downloads when connectivity changes; pauses for phone calls and resumes when completed; built-in large file downloader for downloading files from the web; allows for bookmarked playback of any file on the device; support for video podcasts supported by your device; automatic playlist management; automatic deletion of old episodes if configured; and full storm touch support, may need to disable compatibility mode. The supported devices list includes: BlackBerry 8100, BlackBerry 8110, BlackBerry 8120, BlackBerry 8130, BlackBerry 8120i, BlackBerry 8220, BlackBerry 8230f, BlackBerry 8300, BlackBerry 8310, BlackBerry 8320, BlackBerry 8330, BlackBerry 8330m, BlackBerry 8360, and BlackBerry 8370. The page also includes a 'Latest Reviews' section.

3. Once you have downloaded the app, go to the email which had the RSS feed link in it
4. Click the link in email

5. Device will ask if you want to subscribe to RSS feeds.
6. Choose yes
7. You should now be able to see and hear the podcast.
